DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 15, 2006 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5, 14, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Rebstock et al (134,931: figures 1-3 and the entire specification).

Rebstock et al teach an upper die (B) made in two parts (specification, column 2, lines 26-30) divided vertically and clamped together laterally, a pair of opposed inlets (U) in the upper mold (B) for injecting molten material. One of the inlets (U) satisfies the resin inlet in the upper mold. The inlets (U) also include a gap between the upper mold (B) and the bottom mold (A). The gap is defined by the spacing ring (E). The language regarding resin is intended use and the mold of Rebstock et al is clearly capable of molding resin.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 5, 14, 16 and 17 have been considered but are moot in view of the new ground(s) of rejection.
